GEOMEMBRANE / EXTRUSION WELDER

THERMOPLASTIC WELDING EQUIPMENT

HEBEI MINGMAI TECHNOLOGY CO.,LTD
MM-TECH

Company profile

Hebei MingMai Technology Co.,Ltd is a comprehensive manufacturer and an experienced professional exporters in China.

SWT's key products are used for an extensive range of welding applications,including:

- 1.Extrusion welder
- 2.Geomembrane welder
- 3.Banner welder
- 4.Roof waterproofing membrane welder
- 5.Hot air gun
- 6.Test tool

All the products have been developed and tested by experienced teams.

With strong relationships and good credit, we cooperate closely to develop the global markets together.

Our products are strictly under the control of ISO9001:2000 QC system.

In addition, we have set up an independent professional QC team, who are mainly responsible for checking original materials and components, checking production process and tracking the quality after selling, just to assure customers with a guaranteed satisfaction with what they buy and to enhance their business.

Hebei MingMai Technology Co.,Ltd is willing to work with you to develop the thermoplastic welding equipments with innovative products and complete butt fusion solutions,to improve welding technical system concept.

Make us as your first choice when sourcing for your requirements.

Hot Air Welding Gun SWT-NS1600

Introduction

The hot air welding gun is double insulated, temperature constantly and continuously adjustable, which is used in welding hot melt plastic material such as PE, PP, EVA, PVC, PVDF, TPO. Also it is used in other works like hot forming, shrinking, drying and igniting.

Features

1. Welding Nozzle: Variety of stainless steel welding nozzles available;
2. Heating Elements: thermostable ceramic and silver coated terminal;
3. Dynamic Balance: all of hot air guns passed dynamic balance test;
4. Adjustable Temperature: 20-600 °C

Model

SWT-NS1600

SWT-NS1600S

Model	SWT-NS1600	SWT-NS1600S
Voltage	220V/110V	
Frequency	50/60Hz	
Power	1600W	
Adjustable Temperature	20-600 °C	
Air Volume	Max 180L/min	
Air Pressure	2600Pa	
Noise	≤ 65Db	
Handle Size	65mm	58mm
N.W	1.2kg	1.2kg
G.W	3.5kg	3.5kg

Accessories

20mm Wide Slot Nozzle 40mm Wide Slot Nozzle Round Nozzle Triangle Nozzle Tubular Nozzle Tacking Nozzle Heating Element Pressure Roller

Application

Hot Air Welding Gun SWT-NS3400

Introduction

The hot air welding gun is double insulated, temperature constantly and continuously adjustable, which is used in welding hot melt plastic material such as PE, PP, EVA, PVC, PVDF, TPO. Also it is used in other works like hot forming, shrinking, drying and igniting.

Features

1. Welding Nozzle: Variety of stainless steel welding nozzles available;
2. Heating Elements: thermostable ceramic and silver coated terminal;
3. Dynamic Balance: all of hot air guns passed dynamic balance test;
4. Adjustable Temperature: 20-600 °C

Model

SWT-NS3400

Model	SWT-NS3400
Voltage	220V/110V
Frequency	50/60Hz
Power	3400W
Adjustable Temperature	20-600 °C
Air Volume	Max 180L/min
Air Pressure	3200Pa
Noise	≤ 65Db
Handle Size	65mm
N.W	1.5kg
G.W	3.5kg

Accessories

70mm Wide
Slot Nozzle

Roller

Application

Hot Air Welding Gun SWT-NS2000

Introduction

The hot air welding gun has two separated parts: air blower and heating gun, the handle is small and easy to be operated. It's double insulated, temperature constantly and continuously adjustable, which is used in welding hot melt plastic material such as PE, PP, EVA, PVC, PVDF, TPO. Also it is used in other works like hot forming, shrinking, drying and igniting.

Features

1. Welding Nozzle: Variety of stainless steel welding nozzles available;
2. Digital Display: Temperature readed on the screen;
3. Adjustable Temperature: 20-600℃
4. Air Blower: it comes with air blower, other blower optional.

Model

SWT-NS2000

Model	SWT-NS2000
Voltage	220V/110V
Frequency	50/60Hz
Power	1600W
Adjustable Temperature	20-600℃
Air Volume	Max 180L/min
Air Pressure	2600Pa
Noise	≤ 65Db
Handle Size	65mm
N.W	2.4kg
G.W	5.5kg

Accessories

Application

Testing Tools

Air Pressure Tools

Air pressure tester is to test the welding seam quality

Vacuum Leak Tester

Geomembrane vacuum leak tester is to test leak on site.

Application

Tunnels

Water Conservancy

Solid Waste Landfills

Aquaculture

Anticorrosive Equipment

Plastic Pipe Welding

Roof Waterproofing

Membrane Structure

Tents

Outdoor Advertising

Rubber Flooring

Inflatable Toys
